JEET THAKKAR

Software Engineer | Backend Developer | Java | Spring Boot | Python | SQL | Microservices | Kafka

Canada | jeetthakkar2612@gmail.com| github.com/jeet7122 | jeet7122.github.io

SUMMARY

Entry-Level Software Engineer with hands-on experience designing and developing scalable backend systems, REST APIs, microservices, and AI-powered applications using Java, Spring Boot, Python, SQL, Kafka, and AWS. Strong foundation in data structures, algorithms, OOP, system design, debugging, unit testing, and software development best practices. Built production-style projects involving distributed systems, ATS optimization, RAG pipelines, and cloud-native architectures. Passionate about building reliable, high-performance software solutions and AI-enabled enterprise products.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL
Frameworks: Spring Boot, FastAPI
Backend: REST APIs, Microservices, Distributed Systems, API Gateway, Scalable Systems
Databases: MongoDB, PostgreSQL, MySQL, Redis, SQL Server, Oracle
Messaging: Apache Kafka, RabbitMQ
Cloud/DevOps: AWS (EC2, S3), CI/CD Pipelines, Version Control
Tools: Git, GitHub, Linux, Postman, Docker, Kubernetes (basics), Jira, OpenAPI/Swagger, Maven, NPM
Testing: JUnit, Mockito, Pytest, Unit Testing, Integration Testing
AI/GenAI: OpenAI/Gemini API, LangChain, LangGraph, RAG, Prompt Engineering, Embeddings, ChromaDB, Vector Search, Structured Outputs
Concepts: Data Structures, Algorithms, OOP, SOLID, Concurrency, System Design, Agile Methodologies, SDLC, Code Reviews, Problem Solving

EXPERIENCE

Software Developer (Contract),
Remote | 09/2025 - Present

- Designed and developed **scalable, cloud-native microservices** using Java and Spring Boot for business-critical workflows.
- Built and maintained **high-performance REST APIs** with focus on reliability, clean architecture, and maintainability.
- Implemented **asynchronous event-driven communication** using Apache Kafka, improving throughput and responsiveness.
- Contributed to **CI/CD pipelines** enabling faster and reliable software releases.
- Participated in **Agile** ceremonies, **code reviews**, **debugging, and technical documentation**.
- Resolved **production issues** in distributed systems through logging, monitoring, and performance tuning.
- Collaborated with **cross-functional teams** including QA and frontend developers.

PROJECTS

ATS Resume Intelligence Platform | Spring Boot, Spring AI, FastAPI, LangChain, Gemini AI, PostgreSQL
Repo Link: https://github.com/jeet7122/ats_resume_intelligence_platform

- Built **AI-powered** ATS Resume Optimization platform using **polyglot microservices architecture** with Spring Boot and FastAPI.
- Developed **resume-job matching engine** using weighted keyword scoring, skill normalization, and semantic fit analysis.
- Implemented **RAG pipeline** using **vector search** and **ChromaDB** to retrieve relevant job descriptions, hiring trends, and resume examples.
- Integrated **Gemini AI** and **LangChain workflows** for resume rewriting, keyword enhancement, bullet optimization, and summary generation.
- Designed **REST APIs** for resume upload, scoring, optimization, and scan history management.
- Generated structured **JSON outputs** for frontend/dashboard integrations.
- Improved **ATS alignment** and recommendation accuracy through **retrieval-augmented contextual prompting**.

Backend Video Processing System - Spring Boot, Maven, JWT, AWS, Kafka, Microservices, Spring Cloud Registry
Repo Link: https://github.com/jeet7122/streaming_platform

- Architected **distributed microservices** platform with multiple **independently scalable services**.
- Designed **Kafka-based** asynchronous communication for **event-driven workflows**.
- Designed **REST APIs** for video upload, authentication, metadata management, and inter-service communication.
- Improved **throughput by 4x** and **reduced latency by 60%** through parallel processing and service orchestration.
- Containerized services using **Docker** and **deployed on AWS EC2**.
- Implemented **fault-tolerant** design, structured logging, and monitoring.

Distributed Code Execution Platform - Spring Boot, Node.js, NPM, Kafka, Docker
Repo Link: https://github.com/jeet7122/code_execution_platform

- Engineered distributed platform for **concurrent code execution** workloads.
- Built **asynchronous job pipelines using Kafka** for scalable processing.
- Developed **secure execution services**, **validation layers**, and **API orchestration**.
- **Tested and validated** REST APIs using Postman, improving endpoint reliability and debugging efficiency.
- Implemented with **resilient containerized** execution environments using Docker.

EDUCATION

Diploma in Computer Programming - St. Clair College - Zekelman School of Information Technology | 2024 - 2026
Relevant Coursework: Data Structures and Algorithm, System Design, OOP, Networking, Concurrency
